

THE WOODSHEDDERS

1. Four monitors in front and one for drums is best,

2. Three monitors in front and one for Drums is workable,

3. Three can suffice in a pinch...Drums always gets the third

We like plenty of Fiddle DI and Dwaynes vocal across the monitors,
with Ryan's and Dave's vocal mic levels a notch beneath.

We like all instruments mixed in the monitors, but no drums please!
